 **Save Our Snow** Don't fall for the urban myth that turning your thermostat way down causes your heater to "work harder" later and ultimately use more energy. The lower you turn down your thermostat during unoccupied times, the more you'll save! Check out this DOE link for more details...

 **Energy Savers: Thermostats and Control Systems**  
[www.energysavers.gov](http://www.energysavers.gov)  
You can save around 10% a year on your heating and cooling bills by simply turning your thermostat back 10°-15° for eight hours. You can do this automatically without sacrificing comfort by installing an automatic setback or programmable thermostat.

**My Sustainable Year**

My Sustainable Year is your chance to try out 52 green ideas, one week at a time. Check out this week's goal by clicking here -- or, listen to KPCW 91.1FM every Monday,

**Park City "Blue Sky Week"!**

City Council in Park City has declared September 6th through 10th as "Blue Sky Week". Click here for details on how to support renewable energy and help our community meet its

## Park City Individual Carbon Calculator

### Select an Activity

The building calculator will estimate the greenhouse gas emissions from your building's electricity and natural gas consumption. The basic calculator will estimate energy use and emissions based on similarly sized buildings in Park City, while the detailed calculator will use your utility data.

Basic

Detailed

Building

Apartment  
(1,000 square feet)

Car

Small House  
(1,500 square feet)

Flight

House  
(2,000 square feet)

Water

Large House  
(3,500 square feet or greater)

Waste

Please select the approximate size of your building or enter the exact square footage in the box below and then click Add to My Footprint.
